Subject: RE: Amherst server

Is the wiring in place, or does it have to done?

Jim

Hi Jim,

It looks like this keeps working its way back to you. My understanding is that Chris needs at least two network drops and two phone connections; one set for her and another set for a multi-funtion copier/printer/fax machine. I am trying to find out if anyone else will be in that office which would require yet another set of jacks. I am also trying to find out the room number. But maybe this is enough info to get things started?

-Eric

Hi Eric, I am writing to you from Telecommunications at Umass. I was forwarded these emails to make sure that the information gets the right person.

If you need some work done by Telecom on campus, please contact James Hanchett at 413-545-2607, email james.hanchett@state.ma.us

He is the person who submits the work requests to me to have work done by Telecom.

Feel free to contact me with questions.

Mary Wiseman
Telecom
5-3090

Good morning Eric,

I don't want you to think we are all passing the buck but here is how you get a new jack somewhere, or if there is a jack there already, how you get it activated.

If our web site is any good you will be able to get exactly what you need by following the procedures at:

http://telecom.oit.umass.edu/tug_rep/

If that somehow doesn't work, then I am happy to be your agent of last resort.

Graeme Sephton
